KUMARI NISHA SOREN

SOFTWARE ENGINEER | .NET API DEVELOPER

Kolkata, West Bengal | +91-8777589913 | nishasoren1996@gmail.com
LinkedIn: linkedin.com/in/kumari-nisha-soren-528a35123 | Portfolio: nisha-soren-portfolio.netlify.app

PROFESSIONAL SUMMARY

Software Engineer with approximately 4 years of experience developing, enhancing, and supporting enterprise applications using C#, .NET, ASP.NET Core, Web API, RESTful APIs, SQL, and Angular. Experienced in API integration, XML-based data exchange, WCF/SOAP services, Entity Framework, API documentation with Swagger/OpenAPI, and code-quality analysis with SonarQube. Skilled in requirement analysis, debugging, root-cause analysis, testing, production support, Git-based source control, Jenkins CI/CD pipelines, and Azure-based environments. Experienced in technical design discussions and code reviews, with healthcare application experience.

TECHNICAL SKILLS

Programming: C#, JavaScript, Progress 4GL (OpenEdge ABL)

Backend & APIs: .NET, .NET Core, ASP.NET Core, ASP.NET MVC, Web API, RESTful APIs, WCF, SOAP web services, Entity Framework

Data & Integration: SQL Server, MySQL Server 2019, Progress OpenEdge DB, XML, JSON, database operations and troubleshooting

API Documentation & Code Quality: Swagger/OpenAPI, SonarQube, API documentation, static code analysis

Frontend: Angular, JavaScript, HTML5, CSS3, WPF, API-driven UI development

Cloud & CI/CD: Microsoft Azure, Azure DevOps, Jenkins, CI/CD pipelines, IIS, Virtual Machines, deployment validation

Version Control: Git, Git Extensions, GitHub, branching, change tracking, code reviews, release management

Engineering Practices: SDLC, Agile/Scrum, requirement analysis, technical design discussions, debugging, root-cause analysis, refactoring, performance optimization, production support

Tools & Testing: Visual Studio 2022, Visual Studio Code, OpenEdge Developer Studio, functional testing, regression testing, defect validation, unit/integration testing concepts

PROFESSIONAL EXPERIENCE

Software Engineer | March 2025 – September 2026
Greenway Health India | Bengaluru, India (Remote)

- Develop, enhance, and maintain enterprise applications for the Intergy product in the US healthcare domain using Progress 4GL (OpenEdge ABL), C#, .NET, and WPF.
- Develop and maintain application components and REST/Web API integrations using .NET technologies to support business workflows and application functionality.
- Work with WCF and SOAP-based web services to support service-to-service communication and application integration; handle XML-based data exchange where required by the workflow.
- Use Entity Framework for data access and database interactions in .NET application components.
- Document and review REST API endpoints and API contracts using Swagger/OpenAPI to support integration and testing.
- Use SonarQube static analysis findings to review code quality, identify maintainability issues, and support adherence to coding standards.
- Participate in technical design discussions, considering maintainability, performance, reliability, and consistency with existing application architecture.
- Participate in code reviews, provide technical feedback, and support refactoring and coding-standard improvements.
- Analyze requirements and existing workflows, implement features, debug issues, test changes, and support production releases.
- Investigate defects across application layers by tracing user-facing behavior through backend services and Progress OpenEdge database operations.
- Perform production incident triage, debugging, root-cause analysis, and corrective fixes to restore application functionality within required timelines.
- Build and maintain Jenkins CI/CD pipelines for automated builds, deployments, and validation across development and release environments.
- Use Git and Git Extensions for source control, branching, change tracking, and release management; collaborate with QA, engineering, and DevOps teams on functional/regression testing and release readiness.
- Create technical documentation covering application behavior, business flows, troubleshooting, deployment activities, and operational knowledge.

Project: Intergy

Software Engineer | June 2022 – October 2024
Quadrant Technologies Pvt. Ltd. | Hyderabad, India

- Contributed to the design, development, enhancement, and maintenance of enterprise applications using .NET technologies, with attention to reliability, performance, security, and scalability.
- Developed RESTful/Web API services and integrated backend services with front-end applications to support data-driven workflows.
- Worked on Angular and JavaScript front-end integrations with backend APIs to support user-facing application functionality.
- Implemented application enhancements and defect fixes across development and testing environments, validating changes against functional and technical requirements.
- Participated in requirement analysis, technical design discussions, estimation, sprint planning, backlog refinement, daily stand-ups, and Agile/Scrum delivery.
- Used Azure DevOps for work-item tracking, source control, release coordination, deployment activities, and collaboration across development and operations teams.
- Supported Microsoft Azure deployments and environment configuration, including virtual-machine-based application environments and release activities.
- Troubleshot application incidents by reproducing defects, identifying root causes, and implementing corrective fixes.
- Participated in code reviews and applied coding standards, refactoring, and maintainability practices to improve code quality.
- Collaborated with QA, DevOps, SMEs, and business teams to validate fixes, prepare releases, and deliver changes within expected timelines.
- Created deployment notes, technical documentation, and troubleshooting guides to improve operational support and knowledge sharing.

Project: Azure Purview — Microsoft Purview

EDUCATION

Bachelor of Technology (B.Tech), Information Technology | January 2018
Government College of Engineering and Ceramic Technology, Kolkata | GPA: 7.7/10

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900)
- Certified in Progress 4GL (OpenEdge ABL)
